

We Challenge you to Challenge Us...

Bring your most complicated applications to the 3 Sigma Design Team. We will design and manufacture a specialty tape to fit your needs!

REQUIREMENTS:

- Innovative design
- Manufacturing efficiency
- Value-Added profitability

DESIGN:

- Innovative approach
- Extensive expertise
- Efficient design phase

COMBINED WITH:

- Array of substrates
- Emulsion, hot-melt and solvent technologies
- Variety of liner options

RESULTS:

- Added Efficiency
- Reduced Cost
- High Margin Profitability
- Impressed Customers

SPECIALTY TAPE PRODUCTS OVERVIEW

"Specialty Pressure Sensitive Adhesive Products"

Our Vision:

To be the preferred provider of pressure sensitive specialty products and services to the label converting, office supply, business forms and tape markets.

Our Mission:

To expand our reputation, products, capabilities and customer base, establishing a higher level of quality and service within the pressure sensitive industry.

Dedicated to Innovative Pressure Sensitive Solutions

3 Sigma is a rapidly growing, resourceful innovator of unique pressure sensitive coated products. We have the expertise with material and process technologies to consistently produce superior products that meet your ultimate requirements. Our commitment to you is to continuously seek ways to address and improve critical business needs:

- Speed of development and commercialization
- Production efficiency
- Product performance
- Quality

Differentiate Your Company from Your Competition

Our customer service and technical associates will work with you to develop and manufacture custom constructions that allow you to provide innovative products to your end-user. All of 3 Sigma's associates are focused on assuring a "customer-friendly" experience that offers:

- Easy access to 3 Sigma's management and technical experts
- Flexible and responsive production with the quickest custom order turn-around in the industry
- Utilization of our facility and tech support for your design and trial experiments
- Production volumes and product designs that meet your needs, not ours

Bring On Your Challenge

3 Sigma provides innovative solutions for your most challenging applications:

- Specialized adhesive formulations
- Specific roll lengths
- Pattern adhesives or cohesives
- Specialty features like pigmentation or taggants
- Short turn-around time

When your customers' requirements challenge you, our top-rated customer service and sales staff are experts at solving the difficult requests. We have the flexibility and the range of product and process capabilities to meet your exact specifications every time.

Industries

3 Sigma's unique ability to design and manufacture custom products to fit end-users' specific needs can be utilized to produce specialty tapes for the following industries:

- Transportation/Automotive
- Specialty Packaging
- Building/Construction
- Electronics
- Alternative Energy/Solar
- Retail Display/P.O.P.

Case Study

New specialty tape product helps manufacturer vastly improve efficiencies.

Recently, one of 3 Sigma's customers came to us with an opportunity. This industrial manufacturer had an application for applying an adhesive coat with a release liner. They wanted to reduce their scrap dramatically, increase the throughput of their production line, and ultimately increase their profitability.

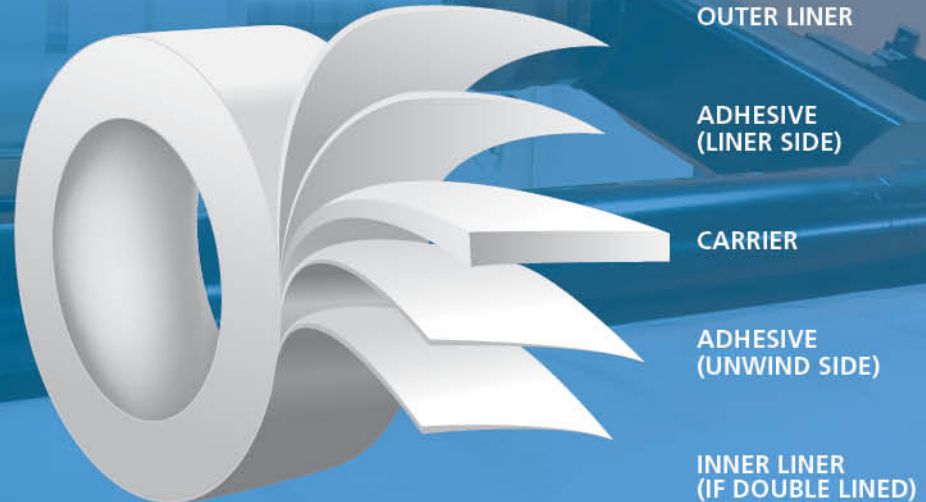

3 Sigma's product development team went to work and quickly provided a specialty industrial tape. The end result: By using this custom product, scrap dropped from 30% to 5% and throughput increased by 5 times! These manufacturing efficiencies have improved the company's profitability immensely.

Why not challenge 3 Sigma to help you in the same way? Let us drive efficiency and profitability.

Capability

3 Sigma can develop and manufacture the following specialty constructions:

- Patterned Adhesive Coating
- Single Liner/Double Liner
- Extended Liner
- Custom Web Widths
- Custom Pigmented Adhesives
- Security Features

Production Lines

3 Sigma operates 13 coating and laminating production lines with the ability to coat hot-melt, emulsion (acrylic) and solvent adhesives. We offer a wide variety of substrates including films and liners which provide a multitude of options to service your custom tape needs.
